Office 365

Data protection and security for every member of your Office 365 family

Verinext's Commvault Backup-as-a-Service for Office 365 provides unlimited capacity and immediate deployment, with no on premises infrastructure commitments, giving you hassle-free data protection and security - all day, every day.

Start your day with peace of mind

The Problem
No Office 365 native backup and recovery service

The Solution
Verinext offers Industry-leading, comprehensive, policy-focused and compliance-driven backup and recovery

---

Manage a tight budget

The Problem
High cost and time of migration

The Solution
Verinext reduces the amount of data moving to the cloud, decreasing project costs

---

Avoid surprises

The Problem
Maintaining compliance

The Solution
Verinext enables hassle-free compliance with GDPR, CCPA, and other government and business regulations

---

Keep things running smoothly

The Problem
Administrative complexity

The Solution
Verinext delivers seamless management of on-premises and Office 365 deployments from a single, integrated console

---

Know your information is always protected

The Problem
Ransomware and accidental data corruption

The Solution
Verinext provides fast data recovery, ensuring business continuity and adherence to service level agreements

---

Rest easy

The Problem
Worries that keep you up at night

The Solution
At the end of the day, rest easy with Verinext's Commvault Backup-as-a-Service for Office 365

An investment in your Office 365 family's future

Ensuring comprehensive protection of all your data, applications, and files is an investment in the financial health of your Office 365 family, and your organization.

Save Money – using cloud-based subscriptions and data rather than on-premises

Save Time – with faster and simpler migrations

Increase Productivity – eliminating systems that you need to manage, monitor, and secure

Lower Total Cost of Ownership – subscribing to a lower-tier Microsoft Office 365 plan

Industry-leading data protection deployed on state-of-the-art and globe-spanning cloud architecture
