

4 WAYS TO STREAMLINE DATA MANAGEMENT FROM EDGE TO CLOUD

Bridge the Digital Transformation Divide With HPE Storage-as-a-Service

With data at the heart of your business, your storage infrastructure needs to have the performance, scale, agility, and efficiency to keep up. But to accelerate your data-driven modernization, you need to eliminate the operational complexity and infrastructure siloes that slow you down.

Verinext, a Hewlett Packard Enterprise Platinum Solution Provider, can bring the speed and agility of a cloud operational experience to your apps and data everywhere with **HPE Storage-as-a-Service** solutions — empowering you to align storage with business demands and focus on managing outcomes, not infrastructure.

HERE ARE FOUR WAYS

HPE Storage-as-a-Service can help you streamline data management and bridge the digital transformation divide.

1 POWER YOUR ON-DEMAND HYBRID CLOUD

With HPE Storage-as-a-Service solutions, you can leverage self-service, on-demand VMs to drive your business with the flexibility of hybrid cloud and a cloud operational experience everywhere.

- Experience simplified data protection and mobility as you slash hybrid cloud complexity with a unified cloud service.
- Move faster with a cloud experience that shifts operations from infrastructure-centric to app-centric.
- Eliminate silos, complexity, and the burden of day to-day storage administration by leveraging AIOps.

2 INCREASE SCALABILITY AND CONSUME AS-A-SERVICE

Shift from owning data infrastructure to simply accessing and utilizing it via a predictable subscription. Leverage simple, workload-optimized storage tiers and scale on demand for unexpected workloads and usage demands.

- Exploit the full potential of your data with a seamless cloud experience and the freedom to run any app without compromise.
- Avoid under- and overprovisioning concerns, CapEx budget constraints, and complex procurement cycles.
- Move from heavy up-front costs to transparent, predictable monthly payments based on actual metered consumption — with complete visibility into your storage utilization at any time.

3 MEET ANY SLA AND RUN ANY APP WITHOUT COMPROMISE

HPE Storage-as-a-Service solutions lower risk with the highest level of availability and ultra-fast performance. Get guaranteed 100% availability for your mission-critical apps and 99.9999% availability for business-critical and general-purpose apps.¹

- Meet your app SLAs, from traditional to modern, with the right performance, resiliency, and efficiency.
- Choose service levels from an as-a-service portfolio of proven, enterprise-grade, on-premises cloud data services, including cost-optimized, balanced, or 100% availability options.
- Leverage purpose-built data infrastructure to meet mission-critical, business-critical, or general-purpose requirements.

4 ACCELERATE TRANSFORMATION WITH SELF-SERVICE AGILITY

HPE Storage-as-a-Service solutions enable line-of-business owners and IT executives to accelerate digital transformation by self-provisioning storage infrastructure without the need for domain expertise. Leverage a suite of SaaS-based apps to power a cloud operational experience across edge, core, and cloud that simplifies operations and eliminates IT complexity.

- Slash 98% of your operational time with app-centric operations and invisible infrastructure.²
- Go faster with self-service agility and reduce TTV by 80%.³
- Free up resources and enjoy 45% lower TCO.³

HPE Storage-as-a-Service solutions, delivered in partnership with Verinext, can enable businesses to bridge the digital transformation divide, streamline data management, and accelerate data-first modernization — all with a limitless cloud operational experience.

With double the expertise across the technology landscape since merging Anexinet Corporation with Veristor Systems Inc., the now-unified **Verinext** delivers the superior technical experience customers need to make informed decisions in today's complex digital world.

UNLOCK YOUR DIGITAL TRANSFORMATION POSSIBILITIES WITH VERINEXT

Verinext delivers transformative business technology so customers are ready for everything that comes next. With a mission to help enterprises realize more for their technology investments, Verinext is passionate about guiding customers to simplify and modernize their technology environment so they can achieve digital transformation goals for faster time-to-value. From automating time-consuming tasks and protecting data assets to securing infrastructure and improving customer experiences, Verinext makes technology truly work. Offering a comprehensive suite of intelligent, full-stack engagement strategies and solutions with modern, secure infrastructure products and services, Verinext activates the innovation that businesses need to make their next move with confidence.
