

WHY YOU NEED ZERO TRUST AND SSE AT THE EDGE

The remote- and hybrid-work era has given rise to security risk that is higher, and more costly, than ever. Consider these 10 stats to see why you need Zero Trust and Secure Service Edge (SSE) solutions to protect your enterprise.

Security Risk is Pervasive

1

206 days is the average time a data breach in the U.S. goes undetected.

2

Ransomware attacks are up **25%** this year.

3

83% of successful breaches involve external actors.

Remote Employees Pose Great Exposure

4

50% of employees have five devices.

5

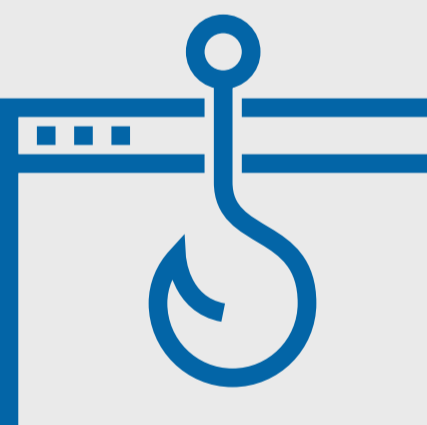

20% have more than five corporate and personal devices.

6

Cybersecurity professionals say excessive user privilege is their **#1** challenge with current access solutions.

7

74% of data breaches involved the human element, including social engineering attacks, errors or misuse.

The Rise of SSE

8

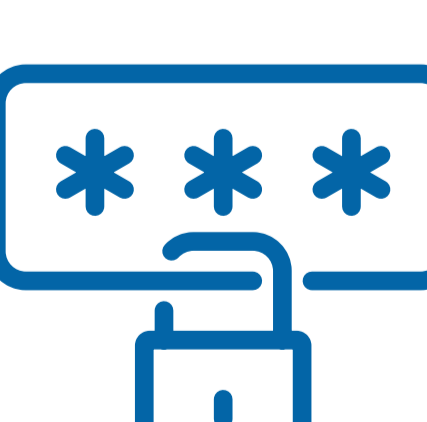

67% of organizations plan to start their SASE strategy with a Security Service Edge (SSE) platform.

9

65% want to adopt SSE within the next 24 months.

10

48% say their primary SSE use case is securing access for remote and hybrid employees.

The future of work is here, and it is truly hybrid. Be sure that your organization has the security posture it needs to avert ransomware, block cyberattacks, automate compliance and enable proactive threat and vulnerability management. *Verinext has you covered.*
