

The background of the advertisement features a group of four hikers with backpacks walking away from the viewer on a grassy trail. The sun is low on the horizon, creating a strong lens flare effect. The scene is framed by large, semi-transparent geometric shapes in shades of blue and teal. Several thin, horizontal white lines are scattered across the upper half of the image.

**HELPING ENTERPRISES REALIZE MORE
FOR THEIR TECHNOLOGY INVESTMENTS.**

At Verinext, we're passionate about collaborating with customers to simplify and modernize their technology platforms so they can realize faster time-to-value through their digital transformation goals. We're also focused on effectively deploying the innovation businesses need to make their next move with confidence.

From automating time-consuming tasks and protecting data assets to securing infrastructure and improving customer experiences, Verinext helps you realize your technologies' value. Offering a comprehensive suite of intelligent, full-stack engagement strategies with modern, secure infrastructure product and service solutions, we'll prepare you for everything that comes next.

VERINEXT SOLUTIONS

Verinext delivers an end-to-end suite of technology solutions to simplify and modernize technology environments so customers achieve digital transformation goals faster.

HYBRID INFRASTRUCTURE

Empower business innovation through adaptable and automated public and private cloud platforms.

Modern infrastructure is hybrid infrastructure. Verinext's architecture and services experts design, implement, and support hybrid infrastructure with automation and management solutions that span all platforms – from public and private clouds to Software as a Service (SaaS) platforms. Simplify your operations and reduce your time-to-value with an integrated, flexible and agile hybrid environment.

INTELLIGENT AUTOMATION

Increase workforce efficiency, improve customer experiences and reduce human error.

A pioneer in robotic process automation, Verinext delivers the intelligent automation solutions that accelerate business and improve efficiencies, end to end. Tap into the power of automation to streamline manual processes, deploy infrastructure more quickly and increase workforce efficiency. Verinext will help you optimize engagements with your customers, employees and stakeholders.

DATA PROTECTION

High performance, secure and resilient architectures to protect your most important business assets.

Manage your continuous data growth and complexity. Verinext protects your environment – from private and public cloud to a wide range of software solutions – so you can achieve the resiliency your business needs to ensure availability and compliance. Whether you're modernizing your infrastructure or managing new business initiatives, Verinext will safeguard your data and your business.

DIGITAL INNOVATION

Modernize legacy apps and implement the software customizations that set your business apart.

With decades of experience in helping companies shift to new business models, future-proof processes and innovate to stay ahead of the competition, Verinext delivers the digital innovations that give you a competitive edge. Using strategy-led innovation, Verinext delivers human-centered software innovation for the agile business.

VERINEXT SERVICES

Verinext offers next-level, end-to-end services backed by an experienced team of passionate technologists.

MANAGED SERVICES

Accelerate transformation while reducing IT cost and risk with managed precision.

Verinext managed services simplify infrastructure management, enhance security, deliver resilient data protection and provide operational reporting and trend analysis for continuous improvements. With Verinext's tailored managed services, you can lower IT costs while getting the critical resources that enable you to anticipate new requirements and pivot quickly when new needs arise.

PROFESSIONAL SERVICES

Design, deployment and delivery across the enterprise – from IT to security and development.

At Verinext, our certified IT professionals have deep expertise in designing, configuring and implementing well-architected, fully-integrated technologies with an unwavering focus on your business goals. Using our perfected methodology, Verinext will deliver and document your solution and plan for any resulting operational changes, all while staying with you throughout your transition and beyond.

CUSTOMER EXPERIENCES

Intuitively engage customers and employees with the omni-channel experiences they won't forget.

Verinext's proven strategy, tools and services will help you build the intelligent connected ecosystem your business needs for an extraordinary customer experience (CX). Optimize your contact centers with seamless, unified communications and deliver data-driven omni-channel experiences that engage and connect with customers using insights and modern application integration.

SECURITY

Comprehensive security and risk management to protect your data, and your brand.

Advance your security posture – cloud to edge – so you can operate with confidence. Verinext security strategies avert ransomware and cyberattacks, automate compliance to key industry frameworks and enable proactive threat and vulnerability management. Verinext will fortify your business against future risks so you can prevent devastating loss of capital, brand equity and customers.

NETWORKING

Power your connected business with modern networks that are intelligent, responsive and secure.

Today's modern networks are experience driven and must be able to support changing requirements at the edge and access layers. Verinext designs and delivers those modern networks with all the services necessary to integrate and manage the full network lifecycle process. With Verinext, your networks will continue to deliver value, even as your Digital Transformation evolves.

AGILE COLLABORATION AND ITSM

Optimize your organization's productivity with collaboration, workflow automation and IT service management solutions.

For software development and IT teams, as well a business functions from HR to marketing and finance, Verinext, along with its subsidiary Forty8Fifty Labs, empowers the agile collaboration that drives efficiency and customer responsiveness through lean IT service management.

FINANCIAL SERVICES

Sustainable IT financing fast-forwards your business transformation and increases your ROI.

Verinext delivers the capital resources you need to stretch your technology budget with ease. Ensure financial predictability, refresh environments more frequently and even annualize discounts while enhancing your return on technology investments. Financing with Verinext gives you increased leverage and agility so you can get technology working for you.

FORTY8 FIFTY
LABS
