

SOLUTION BRIEF

MICROSOFT 365 BACKUP-AS-A-SERVICE

Migrate, Manage and Protect Your Microsoft 365 Environment, End-to-End

Your business and user productivity relies on the sustainable operation of your Microsoft 365 solutions. At Verinext, we are experts in Microsoft 365 data protection, delivering managed backup services for the complete Microsoft 365 ecosystem – from Exchange Online and OneDrive to SharePoint, Project Online and Teams. Our services will ensure the recoverability of all your Microsoft 365 data so your business can maintain continuity in the event of data loss or malicious user activity.

YOUR DATA – SECURE, COMPLIANT AND AVAILABLE

Microsoft 365 is the productivity environment for today's modern workplace but supporting and managing it can be a drain on internal IT teams. Even more critical is ensuring your business data is compliantly and reliably protected. Ease the burden of data protection for Microsoft 365 and give your IT team the time back to work on other strategic initiatives.

With Verinext, you can pass the complexity of protecting Microsoft 365 to a dedicated team, available any time for your users, every day. We have deep expertise in properly applying a shared responsibility model for complete data protection: knowing where the native Microsoft cloud security for protecting the infrastructure ends and where your security for ensuring protection of the data you hold in the cloud begins. With Microsoft 365 Backup-as-a-Service (BaaS) from Verinext, your data remains resilient, protected and available whenever, and wherever you need it.

SAFEGUARD YOUR DATA AND YOUR MICROSOFT 365 INVESTMENT

Verinext's Microsoft 365 BaaS delivers powerful, enterprise-grade Microsoft 365 data protection delivery using world-class backup software. With broad-ranging coverage across the entire Microsoft 365 environment, Verinext keeps valuable data safe from deletion, corruption and ransomware attacks – all with the simplicity of SaaS.

Complete Coverage

Get comprehensive protection across all your Microsoft 365 data. Effortlessly locate active or deleted data rapidly recover from an attack and meet your SLA and compliance requirements with ease.

Enterprise-grade Production

With stringent security standards, privacy protocols and zero-trust access controls built-in, Verinext's Microsoft 365 BaaS provides multi-layer data protection to combat today's data loss threats.

Award-winning SaaS

The Verinext Microsoft 365 BaaS solution offers hassle-free deployments, maintenance and management based on an award-winning SaaS platform that's proven to reduce costs and eliminate headaches so you only pay for what you need.

DATA PROTECTION, END-TO-END

Get professional and on-demand support for your Microsoft 365 data protection, anytime, anywhere.

Verinext's Microsoft 365 BaaS will give you the expertise you need to protect Microsoft 365 with confidence.

End-to-end data protection ensures that your environment is productive, secure, compliant and protected 24/7.

VERINEXT: MANAGING DATA FOR YOU

In the modern world of continuous cybersecurity threats, a comprehensive data management and protection strategy is essential to providing fast recovery in the event of an incident. Finding and retaining the talent that can recover an enterprise at scale is very difficult. Backing up data is easy. Effective recovery when needed is a difficult problem for most enterprises to solve.

The Verinext logo is centered in the lower half of the page. It features the word "verinext" in a lowercase, sans-serif font. The "v" and "n" are significantly larger than the other letters, creating a stylized, geometric shape. The color is a light blue.

With over 15 years in providing data protection and data resiliency managed services, Verinext provides white-glove, expert capabilities to medium and large enterprises.

Find out more about how Verinext can help you solve this critical need and provide peace of mind. Visit [Verinext.com](https://www.verinext.com) today.
