

# Edge Computing Solutions

*powered by ServicePoint*

## POWERING REAL-TIME PERFORMANCE AT THE EDGE

At Verinext, we design, deploy, and manage edge computing solutions that enable businesses to process data where it's generated—eliminating latency, reducing bandwidth costs, and improving operational efficiency.

### IOT AND SMART BUILDINGS

We deploy security cameras, access control, and environmental monitoring systems that process data locally for faster response times and reduced network congestion.

### DATA CENTER EDGE SOLUTIONS

Verinext enables distributed data processing in edge-integrated data centers, improving performance and response times for mission-critical applications.

### END-USER DEVICES

We install desktops, laptops, and tablets that enhance productivity by processing data locally and reducing reliance on centralized servers.

### RETAIL POS SYSTEMS

Verinext enables local transaction processing for POS systems, reducing latency, improving reliability, and minimizing cloud dependency.

### AUDIO VISUAL SOLUTIONS

We deploy digital signage, menu boards, and conference room systems that process and deliver content locally, reducing latency and enhancing collaboration.

### EDGE NETWORKING

Verinext provides Wi-Fi and networking infrastructure that supports edge computing, enabling local data processing and reducing cloud dependence.

### STARLINK DEPLOYMENTS

Starlink Gateways – Our Starlink installations enable decentralized data processing, ensuring real-time satellite communications at the edge without fiber backhaul reliance.

### EV CHARGING STATIONS

Our EV station deployments use edge computing to optimize power distribution, payments, and network communications, ensuring seamless, real-time operations.

# why choose verinext for edge deployments?

Verinext specializes in nationwide, multi-site deployments of edge computing infrastructure, ensuring seamless integration, reliability, and scalability for your business.

## 1

### MASS DEPLOYMENT EXPERTISE

We install devices and edge endpoints across 1,000's of locations for the world's biggest brands, leveraging our Central Command Center to ensure consistent quality across all locations.

## 2

### EDGE INFRASTRUCTURE

From structured copper and fiber cabling to low-voltage wiring for edge cameras, IoT sensors, digital signage, and access control, we build the foundation for your edge computing ecosystem.

## 3

### NETWORK & POWER INTEGRATION

Our expertise in wireless, networking, and power infrastructure ensures optimal performance and reliability for mission-critical edge computing applications.

## 4

### INDUSTRY EXPERTISE

We have decades of experience supporting edge computing for a wide variety of industries including retail, manufacturing, financial services, healthcare, hospitality, and technology sectors.

## OPTIMIZE, SECURE, AND SCALE WITH VERINEXT EDGE COMPUTING SOLUTIONS

By partnering with Verinext, your organization can deploy and manage scalable, high performance edge computing solutions that optimize operations, enhance security, and reduce latency across thousands of locations.
