

Managed *Cyber Resilience*

NO GAPS IN PROTECTION. NO DOUBT IN RECOVERY.

Every minute of downtime costs more than money—it risks trust, opportunity, and reputation.

From outages to ransomware and recovery failures, these disruptions damage customer confidence. Verinext Managed Cyber Resilience helps ensure your data and systems remain protected, your operations recover swiftly, and your compliance posture remains solid.

CHOOSE YOUR LEVEL OF RESILIENCE

Your business has unique needs. That’s why we differentiate between two critical dimensions of resilience—**INFRASTRUCTURE** and **USER**—so you can safeguard operations now while building resilience for tomorrow. Within each dimension, we have three tiers depending on your business’s needs.

VERINEXT MANAGED INFRASTRUCTURE BUNDLES

Layered protection isn’t just about endpoints—it begins with fortifying the backbone of your IT environment. Our Infrastructure Resilience offering ensures your servers, backup systems, and recovery workflows support reliability, availability, and operational continuity across your organization.

ESSENTIALS

Foundational Protection for Budget-Conscious Teams

For organizations that need reliable, always-on protection without overextending resources.

Key Outcomes

- Baseline defense against common cyber threats.
- Consistent backups for M365, CRM, and key workloads.
- Reduced noise in IT operations through AI-powered alerting.

Included Capabilities

- 24x7 Monitoring & Incident Correlation (AI-supported)
- Endpoint Detection & Response (EDR)
- SaaS (M365/CRM) & Workload Backup
- Device Patching & Compliance Assistance
- Endpoint Backup, Patching & Compliance Reporting
- Immutable Backup & Accelerated Recovery Workflows

ADVANCED

Proactive Defense and Rapid Recovery

For organizations ready to move beyond basic protection into a proactive security posture.

Key Outcomes

- Faster recovery times from ransomware and outages.
- Better visibility into vulnerabilities and threats before they spread.
- Operational efficiency by offloading time-intensive security tasks.

Included Capabilities

- Everything in **ESSENTIALS**
- Managed Detection & Response (MDR)
- Security Program Maturity Assessment

PREMIUM

Strategic Resilience with Continuous Improvement

Built for enterprises that prioritize uptime, compliance, and adaptive resilience.

Key Outcomes

- Zero doubt in recovery readiness — tested, verified, and continuously improved.
- Regulatory confidence — mapped to industry frameworks and ready for any audit.
- Executive-level insight — quarterly briefings on your evolving cyber posture.

Included Capabilities

- Everything in **ADVANCED**
- Disaster Recovery-as-a-Service (DRaaS) aligned to your RTOs/RPOs
- Server Monitoring & Management
- Compliance Framework Alignment Report
- Quarterly Resilience Reviews with Executive Insight

VERINEXT MANAGED USER BUNDLES

Layered protection isn't just about infrastructure—it's about how your people and endpoints work securely and efficiently. Choose the level that fits your team's resilience needs:

ESSENTIALS

Foundational Protection at Lower Cost

For organizations seeking cost-effective, core protection and recovery for their users.

Key Outcomes

- Foundational endpoint protection with patching and response.
- Reliable backups for Microsoft 365 and user endpoints.
- Essential safeguards for day-to-day business continuity.
- Affordable resilience without overextending budgets.

Included Capabilities

- Endpoint Patching & Compliance Program
- Endpoint Detection & Response (EDR)
- M365 (OneDrive, SharePoint, Teams, Outlook) Backup
- Active Directory / Azure EntraID Backup
- Endpoint Backup

ADVANCED

Balanced Defense and Rapid Recovery

For organizations looking for a strong blend of proactive protection and reliable recovery.

Key Outcomes

- Robust defense against endpoint threats and phishing attacks.
- Reliable backup and restore for Microsoft 365 and identity platforms.
- Balanced protection for most business environments.

Included Capabilities

- Everything in **ESSENTIALS**

PREMIUM

Maximum Protection and Full Recovery

For organizations that want the most comprehensive cyber resilience package, covering every angle of user and endpoint security.

Key Outcomes:

- End-to-end resilience with backups across endpoints, SaaS apps, and identity systems.
- Strongest defense against evolving threats with managed detection and response.
- User empowerment through security awareness training.
- Minimal downtime with full restore support.

Included Capabilities:

- Everything in **ADVANCED**
- Security Awareness Training
- SaaS Application Backup (up to 5 apps)
- Tier 1 Support for User Restores

Pair Resilience with Reliability

Cyber resilience protects your data. Managed SmartOps protects your uptime.
Together, they create an unshakable foundation for your business continuity strategy.

YOUR NEXT STEP: TEST YOUR RESILIENCE

Don't wait for an incident to reveal your gaps.

Schedule your complimentary **Resilience Readiness Assessment** today. We'll benchmark your current posture, identify vulnerabilities, and recommend the right tier to protect your operations and reputation.
